Serious climbers and adventurers understand the importance of high performance and durability in the equipment they use. It can mean the difference between the success or failure of an expedition. For more than four decades, many of the world's most accomplished mountaineers have chosen Karrimor equipment; outdoor products designed to perform at an elite level, whatever the conditions.

Innovation, versatility, and a contemporary dynamism are the hallmarks of the new Karrimor range.

# ALPINE

Karrimor has been at the forefront of groundbreaking innovation in Alpine packs for more than four decades. From the pioneering Haston Alpinist - the world's first dedicated mountaineering rucksack - in the 1970's, to the more recent Elite Alpiniste products. The new Alpine range does not just build on traditional rules of design, it defines high performance design ethos on which competing products in its class will be judged.

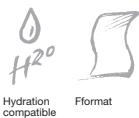

These rucksacks are precision engineered to function perfectly in the most demanding environments on earth. To be used by those who are breaking the defining limits of mountaineering on the world's highest mountains. As with X lite, a super-alpine style philosophy is built into the range at every level. The result: some of the lightest and most versatile climbing and mountaineering rucksacks available.

The new Alpine range offers exceptional performance without compromise: because mountains are uncompromising places.

**X lite - for lightweight performance**

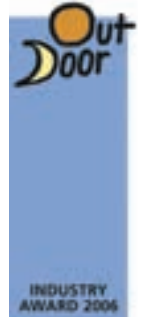

Behind every detail of the X lite range is the presence of the challenge ahead, viewed with the ultimate style of approach in mind - minimalism.

It is midnight in advance base camp. The sound of your crampons on the hard snow of the glacier echoes with uncertainty and expectation. You are about to set out for the climb that will test everything you have to its absolute limit. Weight is everything: a few hundred grams might be the difference between success and failure in an environment where there are no second chances.

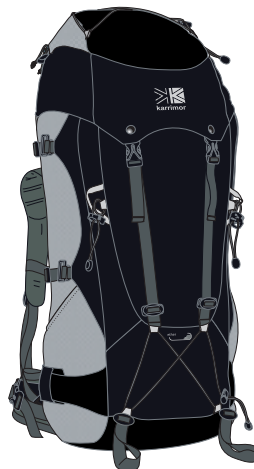

Whether you are climbing the hardest routes on the world's highest mountains, or looking for challenges closer to home that demand the ultimate in lightweight equipment, there is a product here to fit the precise requirements of your adventure.

# BACKPACKING

Since 1946 explorers and adventurers have relied on Karrimor products to help them reach, and exceed their goals. We've harnessed this collective knowledge and experience and have developed high performance load carrying systems for a wide range of activities from day treks to long distance backpacking expeditions. Karrimor backpacks consistently perform, delivering comfort, functionality and durability. That's why we're the UK's backpacking market leader.

#### Contour Adjust

Karrimor has taken some major steps in harness design over the years reaching a new level in the contour adjust system.

The Contour Adjust system splits the two main harness forces into separately adjustable elements for ultimate wearer adjustability and control.

The Pectoralis adjust strap controls the lateral force, thus preventing the pack from falling backwards off the wearer's back.

The Scapula adjust and the Trapezius adjust elements control the backlength and the vertical forces of the pack.

The benefit of this system is that a greater level of comfort and precision of fit is available to the wearer.

#### Iliac Fins

Stabilise the hipbelt sides and transmit the load directly onto the sides of the hips.

The iliac fins also accept the lower ends of the Load Reactive X-Frame, which direct loads from the top compression into the hipbelt.

Works in tandem with the Double Direct SA Bars that fit into the back of the hipbelt to transfer weight to the back of the hipbelt.

#### SAII

The SAII back system brings a leap forward in stability and security to load carrying. Based around the tried and tested SA system, Karrimor has taken fit and comfort to a new level. The Contour Adjust harness is combined with a load reactive X-frame. This is linked to an innovative compression system designed to transfer load directly into the iliac fins which provides unparalleled hipbelt stability, thereby improving carrying comfort.

The new Airspace collection offers the ultimate in ventilation from a carrying system, dramatically reducing back perspiration.

Not just a highly effective, lightweight ventilation system, the Airspace hip harness also pivots with the natural movement of the wearer without compromising stability.

This combination provides leading edge technical performance and comfort in a highly contemporary range of versatile daypacks.

# TRAVEL

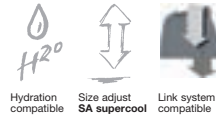

Travel, and particularly air travel, has been through some big changes in recent years with the introduction of more stringent weight restrictions and the new cabin luggage requirements. Karrimor's Global collection delivers options to cater for every traveller's need.

The Global Lite is inspired by the award winning technology of our X-Lite range. We have created a travel pack with daysac and adjustable backsystem that weighs in at just 2.2kg. The pack is ideal for those who value travelling light above all else.

The new Global has shed 750g, without sacrificing performance or durability. And is the benchmark for long haul, multi destination travel. Its versatility, durability and load carrying capacity makes it ideal for longer duration trips involving flying, backpacking and day trekking.

# Rucsac Fabric Information

**KS-P600c**  
A 600 denier polyester plain weave fabric providing a keen balance of performance and value.

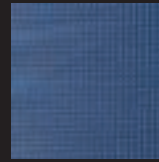

**KS-C Canvas**  
A cotton canvas fabric that is inspired by the packs that Karrimor made in the early days prior to the widespread use of synthetic fibres.

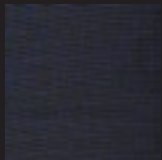

**KS-N100e**  
The world's first waterproof texturised rucsac fabric, a 1000 denier nylon yarn with a 5 coat silicon/PU mix and a silicon DWR which gives an extremely durable high strength fabric.

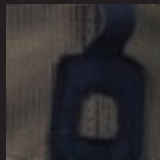

**KS-N140 Dyneema**  
A 140 denier nylon base fabric with Dyneema ripstop yarns, giving outstanding tear strength due to the use of the high tenacity gel spun polyethylene yarn.

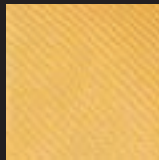

**KS-N210 nailhead**  
A 210-denier nylon nailhead weave structure, used on the lightweight range, this fabric gives an excellent balance between durability and weight.

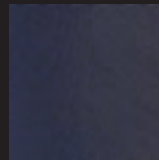

**KS-N210 ripstop**  
A 210-denier ripstop fabric that is used on the hydration range giving excellent tear strength.

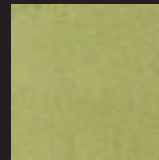

**KS-N210 hypalon**  
**KS-N420 hypalon**  
**KS-N420 hypalon**  
Hypalon is manufactured by impregnating a nylon base cloth with PU to give a fabric with exceptional abrasion resistance making it an ideal fabric for high wear areas.

**KS-N420 string dobbie**  
A 420-denier nylon dobbie fabric providing a lighter weight option for the larger trekking packs without compromising performance.

**KS-N420 HD**  
A 420-denier nylon plain weave fabric providing a lighter weight option for the larger trekking packs without compromising performance.

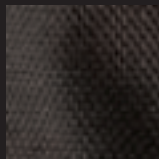

**KS-N500 duratex**  
A 500 denier texturised nylon used exclusively on the X-lite range, giving a outstanding tear and abrasion resistance in heavy wear areas such as the base of the packs.

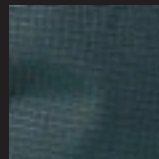

**KS-N500e ripstop**  
A 500 denier ripstop nylon with a 3 layer PU coating and fluorocarbon DWR giving a good balance of weight, abrasion resistance and strength.

**KS-N500e**  
A 500 denier plain weave nylon with a 3 layer PU coating and fluorocarbon DWR giving a good balance of weight, abrasion resistance and strength.

**KS-N1680 ballistic**  
A hopsack weave using a 2-ply 840 denier yarns to give a professional look and is primarily used in the Pro family of packs.

**KS-P150 nanorip**  
A lightweight 150 denier polyester nano ripstop fabric.

**KS-P450 minirip**  
A 450 denier mini ripstop fabric that gives excellent performance/price value.

**KS-P600 microrip**  
A 600 denier micro ripstop polyester fabric with a fluorocarbon DWR and PU coating used exclusively on the women's specific packs.

**KS-P600c ripstop**  
A 600 denier plain weave polyester fabric with a PU coating and fluorocarbon DWR providing a keen balance of performance and value.

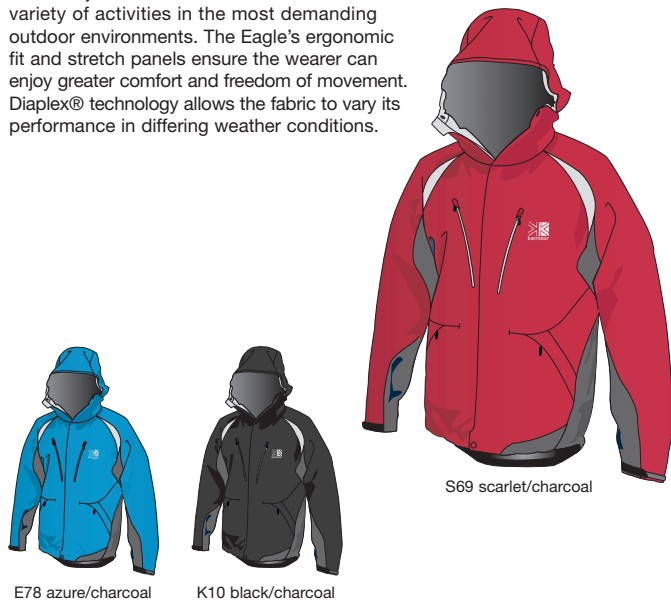

**style name** eagle  
**style code** 2AW07N5  
**size** s-xl  
**weight** approx 500g  
**fabric** 3 layer diaplex® nylon ripstop

- Waterproof and highly breathable
- Visor system mountain hood
- 2 large chest pockets with splash guard zips
- 2 waist pockets
- 1 inner security pocket
- Articulated arms
- Reflective panels
- Stretch panels for freedom of movement

An extremely high performance and highly featured jacket that can be used for a wide variety of activities in the most demanding outdoor environments. The Eagle's ergonomic fit and stretch panels ensure the wearer can enjoy greater comfort and freedom of movement. Diaplex® technology allows the fabric to vary its performance in differing weather conditions.

**style name** merlin  
**style code** 2AW07N9  
**size** s-xl  
**weight** approx 600g  
**fabric** 2 layer diaplex® nylon ripstop

- Waterproof and highly breathable
- Fully adjustable rollaway hood
- 1 large chest pocket with splash guard zip
- 2 waist pockets
- Articulated arms

Combining the durability of the nylon rip-stop face fabric, the comfort of the 2 layer construction and the waterproofness/breathability of Diaplex®, the Merlin is ideal as a year round jacket for use on the hill, slope or for great looking every day protection.

## Clothing Fabric Information

### The Intelligent Textile

Diaplex® represents a quantum leap forward in fabric functionality, and features the world's most advanced shape memory polyurethane polymer - a remarkable material that can 'remember' and retain its shape. A garment made from Diaplex® is actually able to sense changes in the surrounding environment and control its response to ensure the highest level of comfort is achieved.

The intelligence of Diaplex® lies in the unique way in which it takes advantage of Micro-Brownian motion (thermal vibration). Micro-Brownian motion occurs within the Diaplex® membrane when the temperature rises above its activation point. As a result of this motion, micro-pores expand in the polymer membrane which allow the water vapour and body heat to escape. Because permeability increases as the temperature rises, the membrane is able to respond intelligently to changes in the wearer's environment and body temperature.

When the temperature within a garment is low, the Diaplex® membrane acts to reduce permeability and prevent air and water molecules from passing through it which helps to retain body heat.

Throughout the whole process Diaplex® remains waterproof and breathable maintaining wearer comfort at all times.

### Windproof (Peregrine)

At 30gms, this nylon fabric is extremely lightweight. Its windproof, shower resistant and packable properties make this the perfect fabric for running & cycling in the spring and autumn or lightweight walking in the summer.

The rip stop construction ensures that durability isn't compromised to achieve the weight saving.

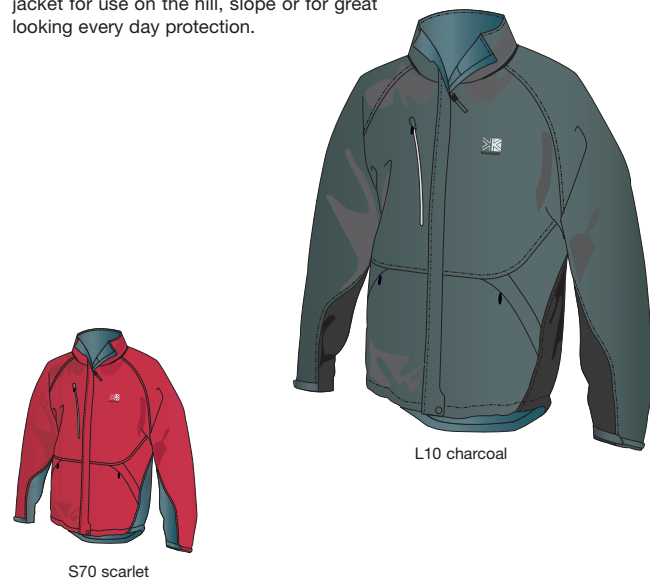

**style name** griffon  
**style code** 2AW07N10  
**size** 10-16  
**weight** approx 550g  
**fabric** 2 layer diaplex® nylon ripstop

**WOMENS**

- Waterproof and highly breathable
- Specific womens cut
- Fully adjustable rollaway hood
- 1 large chest pocket with splash guard zip
- 2 waist pockets
- Articulated arms

Combining the durability of the nylon rip-stop face fabric, the comfort of the 2 layer construction, the waterproofness/breathability of Diaplex® and womens fit the Griffon is ideal as a year round jacket for use on the hill, slope or for great looking every day protection.

**style name** peregrine  
**style code** 2SS07N64  
**size** s-xl  
**weight** 90g  
**fabric** 30g/m<sup>2</sup> rip-stop nylon

- Windproof & highly breathable half zip
- Zipped chest pocket
- Lycra bound cuffs
- Hem drawcord
- Reflective detail
- Articulated sleeves

Extremely lightweight, windproof and breathable smock. Perfect for a variety of fast moving activities and general summer use.

**style name** hawk  
**style code** 2SS07N65  
**size** s-xl  
**weight** 450g  
**fabric** 2 way stretch polyester with a teflon coating

- Water resistant, windproof & breathable
- 2 zipped waist pockets
- 1 zipped chest pocket
- Articulated sleeves

An extremely versatile, highly water resistant, wind proof and breathable soft shell. The Hawk can be used in many conditions and for a variety of activities.

**style name** wolverine  
**style code** 2AW06R30  
**size** s-xl  
**weight** 600g  
**fabric** Japanese nylon soft shell

- Extremely water resistant, windproof and highly breathable
- Collar drawcord
- Security pocket
- 2 large chest pockets
- Water resistant zips throughout
- Articulated arms for freedom of movement

A stylish, well featured soft shell. The Wolverine offers great water resistance, insulation and breathability. With the use of splash guard zips and the reflective detail this jacket can be worn in the majority of conditions whilst still looking at home in the city.

**style name** harrier  
**style code** 2SS07N66  
**size** 10-16  
**weight** 400g  
**fabric** 2 way stretch polyester with a teflon coating

**WOMENS**

- Water resistant, windproof & breathable
- 2 zipped waist pockets
- 1 zipped sleeve pocket
- Articulated sleeves

An extremely versatile, highly water resistant, wind proof and breathable women's fit soft shell. The Harrier can be used in many conditions and for a variety of activities.

**style name** andes  
**style code** 2AW06R4  
**size** s-xxl  
**weight** 850g  
**fabric** 2 layer nylon diaplex® rip stop

**DIAPLEX**

- Waterproof and highly breathable
- Roll away hood with front closure
- 2 large chest pockets
- 2 handwarmer waist pockets
- 1 map pocket inside chest storm flap
- 1 sleeve security pocket
- Internal phone pocket
- Articulated sleeves

A highly featured winter walking jacket in 2 layer Diaplex®. The Andes has a great deal of storage space, is extremely durable and offers a wealth of features making it a great jacket for use in every environment and for many activities.

L90 pewter/cinder

L03 carbon/cinder

E27 royal/cinder

**style name** picos  
**style code** 2SS08N51  
**size** s-xl  
**weight** approx 750g  
**fabric** 2 layer nylon

**DIAPLEX**

- Waterproof & breathable
- Rollaway hood
- 2 handwarmer waist pockets
- Articulated sleeves

A great looking waterproof jacket. The Picos offers protection and comfort on the hill, or in the city.

L01 carbon

N00 navy

**style name** cordoba  
**style code** 2AW06R48  
**size** 10-16  
**weight** 820g  
**fabric** 2 layer nylon diaplex® rip stop

**WOMENS**

**DIAPLEX**

- Waterproof and highly breathable
- Womens cut
- Roll away hood with front closure
- 2 large chest pockets
- 2 handwarmer waist pockets
- 1 map pocket inside chest storm flap
- 1 sleeve security pocket
- Internal phone pocket
- Articulated sleeves

A highly featured womens winter walking jacket in 2 layer Diaplex®. The Cordoba has a great deal of storage space, is extremely durable and offers a wealth of features making it a great jacket for use in every environment and for many activities. The specific womens fit ensures that maximum comfort is achieved.

S81 scarlet/pewter

E58 royal/pewter

G69 avocado/pewter

**style name** picos womens  
**style code** 2SS08N52  
**size** s-xl  
**weight** approx 660g  
**fabric** 2 layer nylon

**WOMENS**

- Waterproof & breathable
- Rollaway hood
- 2 handwarmer waist pockets
- Articulated sleeves

A great looking waterproof jacket designed for the womens form. The Picos offers protection and comfort on the hill, or in the city.

N00 navy

LA5 canvas

**style name** strata II  
**style code** 2SS08N34  
**size** s-xxl  
**weight** approx 530g  
**fabric** 2 layer nylon

- Waterproof & breathable
- Rollaway hood
- 2 large rucsac friendly pockets
- 1 inner security pocket
- Articulated sleeves

A great looking waterproof jacket, the Strata is equally at home on the hill or in the city. A slightly peached face fabric gives a pleasant handle and drape without compromising on durability.
